

Price of French busbar clamps

AI Overview

French busbar clamps typically range from €10 to €80 per unit, depending on current rating, material, and configuration. Busbar clamps are essential for connecting and securing conductors in busbar systems, commonly used in industrial and commercial electrical installations. Prices vary based on several factors:

1. Current Rating and Size: Clamps rated for 100A–200A are generally at the lower end (€10–€25), while higher-rated clamps (400A–800A) can cost €50–€80.
2. Material: Copper clamps are more expensive than steel due to higher conductivity and corrosion resistance. Fully insulated clamps also add to the cost.
3. Configuration: 3- or 4-pole clamps, or specialized clamps for connecting multiple busbars or Flexibar systems, may increase the price.
4. Supplier and Brand: Trusted brands like Eris Industrial, nVent ERIFLEX, and GRL offer reliable clamps, and prices may vary slightly between distributors such as YESSS Electrical, CEF, and PEW Electrical.

Purchasing Tips: Contact local electrical suppliers or distributors for exact pricing and availability. Consider bulk orders for cost savings. Verify compatibility with your busbar system, including insulation and current rating requirements. In summary, expect €10–€80 per clamp, with higher-end models offering enhanced durability, insulation, and higher current capacity. For precise pricing, contacting suppliers directly is recommended.
