

Price of Level 3 Distribution Box with Level 2 Protection

AI Overview

The price of a Level 3 distribution box with Level 2 protection typically ranges from \$150 to \$500, depending on capacity, materials, and additional features.

Overview
A Level 3 distribution box is a three-tiered electrical distribution system designed to provide organized power distribution under a general distribution cabinet. Level 2 protection refers to the inclusion of leakage protection devices at both the main and branch levels, ensuring enhanced safety for connected equipment and personnel. These boxes are commonly used in construction sites, residential complexes, and commercial installations where multiple circuits require reliable protection.

Features Affecting Price
Material and Construction: Boxes made from high-quality, weather-resistant plastics or metal enclosures cost more due to durability and compliance with safety standards.
Capacity: The number of circuits, amperage rating, and compatibility with appliances like air conditioners, water heaters, and lighting systems influence cost.
Protective Devices: Inclusion of MCBs, RCCBs, surge protection devices, and arc fault detection increases the price.
Smart Features: Some modern boxes include energy monitoring, remote control, or modular expansion options, which can further raise the cost.

Typical Price Range
Small residential or light commercial units: \$150-\$250
Medium to large commercial units with multiple circuits and advanced protection: \$250-\$400
High-end or industrial-grade units with smart monitoring and robust weatherproofing: \$400-\$500 or more

Additional Considerations
Installation Costs: Professional installation may add \$50-\$150 depending on complexity and local labor rates.
Compliance and Certification: Ensure the box meets IEC, CE, or local electrical standards for safety and insurance purposes.
Maintenance: Regular inspection and replacement of protective devices can affect l...
