

Price of Mobile Power Distribution Box Signage for Construction Sites

AI Overview

The price of mobile power distribution boxes for construction sites varies widely and is typically provided via quotation based on specifications, materials, and quantity.

Pricing Overview

Mobile power distribution boxes are specialized equipment designed for temporary or portable electrical setups on construction sites. Prices depend on factors such as:

- Material and durability:** Boxes made from thermoplastic, sheet metal, or fiberglass with IP65 or higher ratings for outdoor use are more expensive due to weatherproofing and impact resistance.
- Electrical capacity:** Units with higher amperage, multiple outlets, or three-phase support cost more.
- Portability and size:** Compact, lightweight units with handles or wheels are priced differently than larger stationary units.
- Customization:** Custom signage, internal layouts, or specific outlet types (e.g., CEE industrial plugs) can increase cost.

Typical Price Range

While exact prices are not listed online, suppliers such as Goode Electric, DDY Group, and PC Electric provide quotes upon inquiry. Based on industry standards:

- Small portable units (single-phase, basic outlets, lightweight) may range from \$150 to \$400 per unit.
- Medium to large units (three-phase, multiple outlets, robust weatherproofing) can range from \$500 to \$1,500 or more per unit.
- Custom or high-capacity units with specialized signage or industrial-grade components may exceed \$2,000, depending on specifications.

How to Obtain Pricing

Contact suppliers directly: Provide your requirements, including voltage, amperage, number of outlets, IP rating, and signage needs.

Request a quotation: Most manufacturers respond within 48 hours with a tailored price based on your specifications.

Compare suppliers: Consider shipping, taxes, and warranty when evaluating total cost.

Additional Considerations

Ensure the IP rating is suitable for outdoor construction environment...
