

Price of Optical Cable Support Arm

AI Overview

The price of an optical cable support arm varies depending on material, size, and customization, typically available via direct quote from suppliers.

Overview Optical cable support arms, also known as extension arms or standoff brackets, are used to securely mount fiber optic or ADSS cables on utility poles. They are commonly made from galvanized steel or fiberglass-reinforced materials, designed to withstand environmental stress and support cable weight without sagging. These arms may include reinforcing rods, cleats to prevent rotation, and mounting hardware compatible with standard pole diameters.

Pricing Factors The cost of an optical cable support arm depends on several factors:

- Material:** Galvanized steel arms are generally more durable and slightly more expensive than fiberglass arms.
- Length and Load Capacity:** Longer arms or those designed to support heavier cables will cost more.
- Customization:** OEM or custom designs, including specific lengths, mounting plates, or logos, can increase the price.
- Quantity:** Bulk orders often reduce the per-unit cost, while single-piece orders may be higher.
- Certifications and Standards:** Products meeting ISO, CE, RoHS, or NMX-H-004-SCFI-2008 standards may carry a premium.

How to Obtain Pricing Most suppliers, including Powtech, MIROC, and GECable, do not list fixed prices online. Instead, they provide quotes upon request:

- Powtech** offers customized galvanized extension arms and provides factory or discounted prices via email inquiry.
- MIROC and GECable** provide fiberglass extension arms and standoff brackets, with same-day quotes available after submitting a request.
- Alibaba suppliers** may list minimum order quantities and customization fees, but exact pricing requires contacting the seller.

Typical Price Range While exact prices vary, industry experience suggests:

- Single fiberglass or galvanized support arms:** approximately \$50–\$150 per unit, depending on size and specifications.
- Bulk orders or customized arms:** prices can drop to \$30–\$80 per unit f...
