

Price of Thickened Optical Cable Terminal Box

AI Overview

Thickened optical cable terminal boxes typically range from €20 to €150 depending on port capacity, material, and supplier. Retail Options Amazon Germany offers a pack of 2 thickened 8-port fiber optic terminal boxes with options for 2/4/6/8/12 core connections. Prices include VAT and vary by delivery location, generally starting around €25–€40 per box. Amazon US lists a 24-port SC rack thickened optical fiber terminal box, fully installed, with prices typically in the \$80–\$150 range depending on shipping and seller. Wholesale and Factory Pricing Suppliers on Made-in-China and Junpu provide factory-priced optical cable terminal boxes, which can significantly reduce costs for bulk orders. Prices vary based on customization, port count, and material quality, but bulk orders can start as low as \$15–\$30 per unit for standard 12-port boxes. These boxes are made from durable materials like cold-rolled steel or fiberglass, often with anti-interference and dust/moisture protection, suitable for FTTH networks, office buildings, and data centers. Factors Affecting Price Port Capacity: 8, 12, 16, or 24 ports; higher port counts increase cost. Material: Fiberglass or steel; fiberglass tends to be lighter and corrosion-resistant. Installation Type: Wall-mounted, pole-mounted, or rack-mounted; pre-installed adapters may add to the price. Supplier Type: Retail vs. wholesale; bulk orders from manufacturers reduce per-unit cost. For accurate pricing, it is recommended to compare multiple suppliers, consider shipping costs, and check for VAT or import duties if ordering internationally.
