

Price of a Level 3 Distribution Box with Electricity Meter

AI Overview

The price of a three-level electricity meter distribution box typically ranges from ₹60 per piece for basic models to \$5,000–\$12,000 for industrial or custom enclosures, depending on specifications, materials, and installation requirements.

Residential and Standard Units For standard residential or small commercial installations, meter boxes and distribution boxes can cost between \$600 and \$2,000, with most homeowners paying \$1,000–\$1,400 depending on amperage, phase type, and weatherproofing. In India, basic meter boxes start as low as ₹60–₹100 per piece, with prices varying by supplier and material. These units typically house a single-phase or three-phase meter and may include a few circuit breakers.

Three-Level or Three-Phase Distribution Boxes Three-level or three-phase meter boxes are designed to accommodate multiple meters and circuit breakers, often with enhanced security and weather resistance. For example, the SEE-ME32 three-phase meter enclosure features polycarbonate construction, UV resistance, and anti-tamper design, suitable for pole or wall mounting. Large GRP cabinets for industrial use, such as 530mm x 800mm x 245mm surface-mounted units, offer fire-resistant, durable construction with secure locking mechanisms, and are priced competitively in the UK market.

Industrial and Custom Enclosures For industrial or high-capacity applications, prices can rise significantly, ranging from \$5,000 to \$12,000+, depending on specifications, amperage, number of circuits, material quality, and integrated safety features. Customization options, such as smart monitoring, remote control, and digital displays, can further increase costs. Weather-resistant and outdoor-rated enclosures generally carry a premium compared to indoor-rated units.

Factors Affecting Price

- Material:** Polycarbonate, GRP, stainless steel, or galvanized steel
- Phase and amperage rating:** Single-phase vs. three-phase,...
