

Price of double-ladder side cable trays in Xinping

AI Overview

Double-ladder side cable trays in China typically range from 150 to 400 CNY per meter, depending on material, load capacity, and supplier.

Overview Double-ladder side cable trays are open-frame cable management systems with two parallel side rails connected by rigid rungs, designed for heavy-duty cable installations in industrial, commercial, and data center environments. They provide excellent ventilation, high strength, and easy cable access, making them ideal for multiple cable runs and high-capacity electrical systems.

Factors Affecting Price

Material: Common materials include hot-dip galvanized steel, stainless steel, aluminum, or fiberglass. Galvanized steel is the most economical, while stainless steel and aluminum offer higher corrosion resistance.

Load Capacity: Light-duty trays support up to 50 kg/m, medium-duty 50–100 kg/m, and heavy-duty trays over 100 kg/m. Higher load capacity increases cost.

Dimensions: Widths typically range from 300 mm to 900 mm, with heights from 75 mm to 150 mm. Larger trays require more material and are priced higher.

Supplier Type: Factory-direct or OEM suppliers often offer competitive pricing and volume discounts, while distributors may charge more for convenience and logistics.

Estimated Price Range

Light-duty double-ladder trays: ~150–200 CNY per meter

Medium-duty trays: ~200–300 CNY per meter

Heavy-duty trays: ~300–400 CNY per meter

These prices are indicative and may vary based on order quantity, customization, and shipping to Xinping. For precise pricing, it is recommended to request quotes from local manufacturers or suppliers such as JLH Electric in Shandong or Kam Tai in Guangdong, who provide factory-direct options and custom designs.

Sourcing Tips Request multiple quotes to compare prices and delivery times. Check material certifications and compliance with standards like GB/...
