

Price of fiberglass cable trays in Lebanon

AI Overview

Extruded fiberglass (GFRP) cable trays in Lebanon typically range from \$50 to \$150 per meter, depending on size, load capacity, and supplier. Overview Fiberglass reinforced polymer (GFRP) cable trays are lightweight, corrosion-resistant, and non-conductive, making them ideal for industrial, chemical, and offshore installations in Lebanon. They are available in various sizes, load ratings, and configurations, including ladder, perforated, and solid-bottom trays. The price varies based on: Tray width and depth: Wider or deeper trays cost more due to increased material usage. Load capacity: Trays designed for heavy-duty industrial cables are more expensive. Finish and quality: High-quality GFRP with smooth surfaces and UV resistance commands higher prices. Accessories: Bends, tees, and supports add to the overall cost. Supplier Information Several suppliers in Lebanon provide GFRP cable trays: Al Mustaqbal Fiber Glass LLC specializes in GFRP trays for industrial and commercial applications, emphasizing durability and corrosion resistance. Brilltech Engineers offers fiberglass trays alongside galvanized steel and stainless steel options, with installation support and system design services. Metas Lebanon and SFSP Lebanon also supply cable trays and accessories, though pricing is typically provided upon request. Recommendations For accurate pricing: Contact suppliers directly to request a quote based on your project specifications, including tray length, width, and load requirements. Compare multiple suppliers to account for shipping, installation support, and warranty. Consider bulk orders, which may reduce the per-meter cost. In summary, while GFRP cable trays in Lebanon generally cost between \$50 and \$150 per meter, the exact price depends on specifications and supplier terms. Reaching out to local distributors like Al Mustaqbal Fiber Glass LLC or Brilltech Engineers will provide precise quotes tailored to your project.
