

Price of outdoor electrical distribution boxes in Zimbabwe

AI Overview

Outdoor electrical distribution boxes in Zimbabwe typically range from around USD 30 to over USD 200 depending on size, material, and features.

Overview of Distribution Boxes Distribution boxes, also known as DB boxes, panelboards, or breaker panels, are essential for dividing electrical power into subsidiary circuits and providing protection via fuses or circuit breakers. Outdoor versions are designed to withstand weather conditions and corrosion, often made from metal (sheet steel) or durable PVC. They house components such as bus bars, MCBs, RCDs, and wiring for residential, commercial, or industrial installations.

Price Ranges Small PVC outdoor DB boxes (suitable for single-phase residential use) generally start around USD 30–50. Medium-sized metal boxes with multiple MCB slots and RCD protection can range from USD 80–150. Large industrial or multi-way outdoor distribution boxes with advanced features, such as multiple compartments, higher current ratings, or fiber-optic integration, can exceed USD 200. Prices vary based on supplier, material quality, number of ways (slots), and additional features. Some suppliers in Zimbabwe, such as ZBMS, Sonasolar, and TradeKey, offer a variety of options but recommend contacting their call centers for the latest pricing and availability.

Tips for Purchasing Confirm whether the box is weatherproof and corrosion-resistant for outdoor use. Check the current rating and number of MCB slots to match your electrical load. Compare local suppliers in Harare and other cities for competitive pricing and delivery options. Consider bulk purchases if installing multiple units, as some suppliers offer discounts for larger orders. For the most accurate and up-to-date prices, it is recommended to contact suppliers directly via their websites or call centers.
