

Price of wiring in distribution box and electricity meter

AI Overview

The typical cost for a residential electrical meter box and distribution wiring ranges from \$600 to \$2,500, depending on amperage, materials, and installation complexity.

Electrical Meter Box Costs A standard residential meter box typically costs \$600 to \$2,000, with most installations falling between \$1,000 and \$1,400. Higher-rated units (200A) or outdoor/weatherproof enclosures are at the upper end of this range. Industrial or custom enclosures can cost \$5,000 to \$12,000+ depending on specifications and site conditions. Costs include the meter socket, service disconnects, grounding, bonding, and compliance with local codes. Professional installation ensures proper NEC or IEC compliance, permits, and inspection approval.

Wiring and Distribution Box Costs For a standard residential property, wiring in the distribution box and associated first fix work typically costs £800 to £2,000 per plot, depending on the size of the property and specification level. This includes twin and earth cables, 3-core and earth, data cables, coaxial, and fire alarm wiring. Labour for first fix wiring is usually £1,200 to £2,500, covering 2-3 days of electrician work at day rates of £250-£350, often assisted by a mate at £150-£200 per day. Back boxes and accessories add £150 to £350.

Total Installation Considerations

- First fix: Carcass wiring, containment, and back boxes (55-65% of total electrical cost).
- Second fix: Fitting accessories, consumer unit, testing, and certification (35-45% of total cost).
- New supply connection: Costs vary widely depending on distance from the existing network, trenching, and DNO requirements, ranging from £450 to over £10,000 in extreme cases.

Summary For a typical 3-bedroom house, the combined cost of wiring in the distribution box and installing an electricity meter is likely to be \$1,500-\$4,500 (or £1,500-£3,500 equivalent), depending on amperage, materials, l...
