

Reference Price for Intelligent Power Distribution Cabinets in Peru

AI Overview

Intelligent Power Distribution Cabinets in Peru typically range from USD 1,500 to USD 5,000 per unit, depending on brand, capacity, and PDU integration.

Market Overview The Peruvian market for Intelligent Power Distribution Units (PDUs) and cabinets is emerging but growing rapidly, driven by data center expansion, enterprise digital transformation, and energy efficiency requirements. Lima is the primary demand hub, with increasing adoption in regional capitals. The market is influenced by technological modernization, regulatory pressures, and the need for operational resilience.

Import and Pricing Insights Peru imports most of its power distribution cabinets from China and Vietnam, with shipments including brands like APC and Huawei. Typical imported units include 42U rack cabinets with integrated PDUs (230V-32A), supporting C13 and C19 connections. Based on recent import data, the reference price for such cabinets ranges from approximately USD 1,500 to USD 5,000 per unit, depending on specifications, brand, and included PDUs.

Factors Affecting Price

- Brand and quality:** Global brands like APC or Huawei command higher prices due to reliability and warranty support.
- Capacity and size:** Larger cabinets (e.g., 42U) with multiple PDUs cost more than smaller units.
- Integration features:** Cabinets with intelligent monitoring, remote management, and DCIM compatibility are priced higher.
- Supply chain and import costs:** Prices fluctuate with foreign exchange rates, shipping, and customs duties.

Market Trends Increasing adoption of high-density computing and integration with Data Center Infrastructure Management (DCIM) systems is driving demand for intelligent cabinets. Local IT and facility managers are prioritizing energy efficiency and operational resilience, which can justify higher investment in advanced cabinets. The market is expected to grow steadily through...
