

SC port of optical-to-electrical converter

Overview

SC (Subscriber Connector) is a common type of optical fiber connector that features easy insertion and removal, low loss, and high alignment accuracy. Features ● Interface structure: rectangular bayonet design, easy to plug and unplug, precise positioning. They convert optical and electrical signals, enabling seamless connections between optical fiber and twisted-pair (copper) cables. Depending on the interface type, media converters. The Tektronix P6700 Series optical-to-electrical (O/E) converters change optical signals into electrical signals for convenient analysis on Tektronix DPO7000 and DPO/DSA/MSO70000 Series oscilloscopes with appropriate adapters (see footnote 1 and 2), any other Tektronix oscilloscope equipped with a. The Tektronix P6700 Series optical-to-electrical (O/E) converters change optical signals into electrical signals for convenient analysis on Tektronix TDS7000/5000/3000/500/600/700 Series oscilloscopes equipped with the TEKPROBE interface, or any other oscilloscope when used with the 1103 TEKPROBE. FO media converters for Ethernet and fieldbus enable you to convert your copper interfaces to interference-free fiber optics without the need for complex surge protection, shielding, and equipotential bonding measures.
