

SJB Distribution Box

Overview

The Smart Junction Box, often abbreviated as SJB, is a specialized electronic control unit that consolidates the functions of multiple, decentralized power distribution centers. As vehicles evolve toward electrification and advanced architectures, traditional fuse and relay systems can no longer meet the. The DeltaVTM CTO CHARM Smart Junction Boxes provide an off-the-shelf solution for faster project execution and reduced installation costs. SJBs are factory tested products and ready for installation in the field. Physically, it acts as a centralized hub for connecting the vehicle's wiring harnesses and distributing electrical power. The Continuous Hinge SJB Junction Box Type 12 offers seamlessly welded corners, external screw clamps that are quick and easy to operate, external mounting feet, and weld nuts that provide different internal mounting options.
