

Selection Guide for Bestselling Industrial Ethernet-Level Optical Network Switches

Overview

This guide provides a practical, standards-based approach to selecting managed industrial Ethernet switches and designing robust OT networks. During a Design for Manufacturing (DFM) review, we often emphasize that managed switches allow for Quality of Service (QoS) prioritization—critical when real-time control data must coexist with standard TCP/IP traffic. However, the increased complexity of the industrial PCBA —often requiring more, reliable solution for your data communication application. The industrial Ethernet switch selection guide can lead you to find the right industrial.
