

Standard Price for a Standard Distribution Box

AI Overview

A standard residential distribution box typically costs between \$1,200 and \$2,500, while larger or outdoor units can range from \$3,000 to \$6,000 including installation. Residential Distribution Boxes For a typical home, a 100-125A indoor panel replacement or installation usually costs \$1,200-\$2,500, which includes parts, labor, and permits. A 200A outdoor panel with a new meter socket can cost \$3,000-\$6,000 depending on complexity and location . Prices vary based on amperage, indoor vs. outdoor installation, wiring length, and whether a full panel upgrade or rerouting is required . Commercial and Industrial Units Commercial or industrial distribution boxes are generally more expensive due to higher capacity, durability, and advanced features. Prices depend on voltage ratings, number of circuits, material construction, and integrated safety features. Modern units may include smart monitoring, remote control, and modular systems for future expansion . Outdoor-rated or weather-resistant enclosures carry a premium compared to indoor units . Factors Affecting Cost Amperage and number of circuits: Higher capacity panels cost more. Installation complexity: Longer wiring runs, conduit routing, or structural modifications increase labor costs. Location: Urban areas may have higher labor and permit fees; rural areas may incur transport costs. Customization: OEM branding, modular designs, or integration with building management systems can raise the price . Material and safety features: Weatherproofing, IP ratings, and advanced protective devices influence cost . Summary For budgeting purposes, a standard residential distribution box is generally \$1,200-\$2,500, while larger or outdoor panels can reach \$3,000-\$6,000. Commercial or industrial units vary widely based on specifications and features, and additional costs may arise from installation comple...
