

Standard distribution box unit price

AI Overview

The unit price of a standard residential distribution box typically ranges from \$100 to \$500, depending on capacity, material, and features. Price Overview For residential use, standard distribution boxes (single-phase, 100–125A) generally cost \$100–\$300 for the enclosure alone, while fully equipped panels with circuit breakers may reach \$400–\$500. Mid-range units with higher amperage (150–200A) or outdoor-rated enclosures can cost \$500–\$1,000, especially when including weatherproofing and additional safety features. Industrial or commercial-grade boxes, with three-phase systems, stainless steel construction, or smart monitoring capabilities, can range from \$1,000 to several thousand dollars per unit. Factors Affecting Price Material: Plastic enclosures are cheaper, while powder-coated steel or stainless steel increases cost. Capacity: Higher amperage and more circuit slots raise the price. Features: Smart monitoring, surge protection, and remote control functionality add to the cost. Installation: Labor can add \$1,300–\$1,800 for a standard residential upgrade, with industrial setups costing significantly more. Location and Compliance: Outdoor-rated boxes, IP-rated enclosures, and compliance with UL, CE, or CCC standards may increase the price. Practical Considerations Investing in a quality distribution box reduces long-term maintenance costs and ensures safety. While cheaper units may suffice for basic residential needs, industrial or smart boxes provide enhanced durability, energy management, and future expansion options. Always consult a qualified electrician to select the appropriate unit for your application.
