

UAE outdoor busbar type

AI Overview

Outdoor busbar systems in the UAE are primarily sandwich-type, metal-enclosed busways with copper or aluminum conductors, designed for high efficiency, safety, and environmental protection.

Key Types and Features

- Sandwich Busbar Systems**
Widely used for outdoor applications in the UAE, offered by companies like Wilmar Busways and Delta Electric.
.Construction: Copper or aluminum conductors tightly compressed between insulating layers, often epoxy-coated for water, rust, and chemical resistance.
.Advantages: Lower impedance, better heat dissipation, reduced voltage drop, and high current-carrying capacity.
- Metal-Enclosed Cast Resin Busways**
Manufactured by Delta Electric, these systems are suitable for both low voltage (LV) and medium voltage (MV) applications.
.Thermal Performance: Cast resin insulation withstands temperatures up to 185°C for three hours, complying with IEC 85 and UL 1446 standards.
.Durability: Designed for harsh outdoor conditions with robust enclosures and cooling systems.
- Feeder Busways for Outdoor Use**
Outdoor feeders are equipped with additional protective covers and enclosures to maintain IP65, IP66, or IP67 protection levels.
.Expansion Joints: Recommended for long runs or where busways cross building expansion joints to accommodate thermal expansion.
- Plug-in Contacts**
Silver-plated, maintenance-free contacts ensure reliable electrical connection and minimal resistance over time.
- Modular and Customizable Systems**
Multiplast (FJ Group) and Powerduct systems offer modular setups for easy installation, maintenance, and future expansion.
- Safety**
Insulated enclosures protect against electrical faults, fire, and shock.
- Flexibility**
Systems can be tailored to specific site conditions, including voltage, current rating, and environmental exposure.
- Applications**
Commercial, Residential, and Industrial Facilities: High current distribution, main feeders, and sub-distribution.
Utility and Infrastructure Projects: Outdoor substations, power plants, and large-scale industrial complexes.
