

Unit price of direct-buried optical cable

AI Overview

Direct-buried fiber optic cables typically cost between \$1 and \$50 per linear foot, depending on type, fiber count, and installation method.

Price Range and Factors

The unit price of direct-buried optical cable varies widely based on specifications and installation requirements. For standard underground fiber optic cables:

- Low-end cables (simple multimode, lower fiber count) can cost around \$1–\$5 per foot.
- High-end cables (single-mode, armored, high fiber count, or specialized designs) may reach \$20–\$50 per foot.

Bulk purchases or longer runs often reduce the per-foot cost, while custom specifications or pre-terminated cables may increase it.

Key factors influencing price include:

- Cable type:** Single-mode cables are generally more expensive than multimode cables.
- Fiber count:** Higher fiber counts (e.g., 72, 144, 432 fibers) increase cost due to more material and complexity.
- Armoring and sheathing:** Steel tape or wire armoring for rodent and crush protection adds to the price.
- Installation method:** Direct burial in trenches or plowing may require additional labor and equipment, affecting total cost.
- Environmental resistance:** UV, moisture, and temperature-resistant cables may be priced higher.

Typical Applications

Direct-buried fiber optic cables are widely used for:

- Long-distance communication networks
- Inter-office or campus networks
- Areas without existing duct infrastructure, where trenching or plowing is required

Purchasing Tips

- Confirm specifications: OS1, OS2, OM2, OM3, OM4, fiber count, and armoring type.
- Request quotes: Suppliers like HOC, Corning, and Discount Low Voltage provide custom pricing based on length and specifications.
- Consider pre-terminated options: These can save up to 75% in installation time and labor costs.

In summary, while the unit price ranges from \$1 to \$50 per foot, the exact cost depends on cable type, fiber count, armoring, and installation method. For precise pricing, contacting suppliers with your project specifications is recommended.
