

Warranty Period for Fiber Optic Cable Engineering

AI Overview

Fiber optic cables typically carry a standard 1-year warranty, with extended system warranties ranging from 15 to 25 years when installed by certified technicians using approved components. Standard Manufacturer Warranties Most fiber optic cable manufacturers provide a 1-year warranty covering defects in material and workmanship for cables and standard passive connecting hardware from the date of purchase, ensuring compliance with TIA/EIA specifications at the time of shipment (OCC) . Some manufacturers, like Leviton, also offer a 1-year standard limited product warranty for products not included in extended system programs . Extended System Warranties Extended warranties are available when the fiber optic cabling system is installed by certified technicians and follows manufacturer-approved design and installation procedures. For example: OCC MDIS Extended Performance 25-Year Warranty covers fiber optic cables, passive connecting hardware, and certain copper cables installed by MDIS-certified installers, guaranteeing performance according to TIA/EIA 568-C.2 and ISO/IEC 11801 standards for 25 years . Industry standards often require a minimum 15-year component manufacturer's performance warranty for fiber optic cabling systems, ensuring long-term reliability when installed under proper supervision and using approved components . Conditions for Warranty Validity To maintain warranty coverage: The system must be designed and installed by technicians with current manufacturer certifications for system design, installation, and testing . Only manufacturer-approved cables, connectors, and hardware may be used . The system must be tested according to the manufacturer's prescribed test plan, and documentation of the warranty certificate must be submitted within the required timeframe . Warranties generally exclude damage from improper installatio...
