

What are the concerns about China Unicom fiber optic cables

Overview

The United States has for years expressed concerns about China's role in handling network traffic and the potential for espionage. SINGAPORE (Reuters) - Chinese state-owned telecom firms are developing a \$500 million undersea fiber-optic internet cable network that would link Asia, the Middle East and Europe to rival a similar U.S. The plan is a sign that an. The Federal Communications Commission (FCC) adopted an order revoking China Unicom (Americas) Operations Ltd. 's authority to operate in the U.S. This report analyzes how this significant tariff will impact the U.S. telecommunications sector, focusing on cost implications, supply chain disruptions, market responses. A new source of tension in the South China Sea — until now focused on fisheries, resource extraction and freedom of navigation — is beginning to get attention: the undersea fiber-optic cables that crisscross the strategic waterway and carry almost all of the region's internet and other. Washington has been raising alarm about the network of more than 400 subsea cables that handle 99% of international internet traffic and about threats from China and Russia.
