

What is a reasonable price for exported mesh cable trays

AI Overview

The cost to export mesh cable trays typically ranges from \$10 to \$50 per meter depending on material, size, and customization, with additional shipping and certification costs for international export.

Price Factors

The price of wire mesh cable trays depends on several key factors:

- Material:** Stainless steel (SS202, SS304, SS316) and galvanized steel are common, with stainless steel being more expensive due to durability and corrosion resistance.
- Size and Dimensions:** Widths range from 50mm to 600mm, heights from 50mm to 100mm, and lengths from 1m to 2.5m. Larger or custom sizes increase cost.
- Type of Tray:** Wire mesh trays are lightweight and ventilated, while ladder, solid-bottom, or trough trays may cost more due to heavier construction or additional protection.
- Certifications:** Export-ready trays often meet international standards like IEC 61537, which can add to the price.
- Accessories:** Supports, bends, connectors, and covers are additional costs for complete installation.

Export Considerations

- Shipping Costs:** International shipping depends on weight, volume, and destination. Bulk orders reduce per-unit shipping costs.
- Customs and Duties:** Import tariffs vary by country and can affect the total export cost.
- Supplier Location:** Suppliers from China, India, and other manufacturing hubs offer competitive pricing, but shipping distance impacts cost.
- Order Volume:** Larger orders often qualify for discounts, while small quantities may have higher per-unit costs.

Typical Price Range

- Standard wire mesh trays: \$10–\$25 per meter for galvanized steel.
- Stainless steel trays: \$20–\$50 per meter depending on grade and thickness.
- Custom or heavy-duty trays: Prices can exceed \$50 per meter, especially with additional accessories or certifications.
