

What is an AEP distribution box

AI Overview

An AEP distribution box is a hardware component that delivers DIRECTV and OTT content from the Advanced Entertainment Platform (AEP) to multiple in-room TVs in hospitality or commercial properties.

OverviewThe AEP distribution box is part of the Advanced Entertainment Platform (AEP), which combines satellite TV and over-the-top (OTT) streaming services to provide a premium in-room entertainment experience for hotels, healthcare facilities, and other commercial institutions. It acts as a central hub that receives content from DIRECTV satellite feeds and broadband sources, then distributes it to individual rooms or TVs through the property's existing wiring infrastructure.

Key Functions

- Content Distribution:** Sends linear satellite channels and OTT streaming content (like Netflix, Showtime, Hallmark, and Amazon Prime) to multiple TVs without requiring a separate set-top box for each room.
- Integration with COM Systems:** Works with HD COM2000 or COM3000 systems, allowing properties to manage multiple rooms efficiently and customize the entertainment experience.
- Centralized Management:** Enables property managers to control programming, customize home screens, and reset content remotely to remove previous guest data.
- Enhanced Guest Experience:** Supports 4K HDR, HD, and SD channels, along with cloud-based updates and streaming apps, providing a seamless and modern entertainment experience.

Additional Features

- Customizable Interface:** Allows branding with logos, colors, and personalized messages for guests.
- Antimicrobial Remote Support:** Works with specially designed remotes that are easy to clean and do not require pairing.
- Scalability:** Suitable for properties ranging from small boutique hotels to large healthcare facilities with thousands of rooms.

In essence, the AEP distribution box is the central device that powers the Advanced Entertainment Platform, ensuring that all connected rooms receive high-quality satellite and streaming content efficiently while allowing centralized control and cus...
