

What is the price of Dominic cable trays

AI Overview

Dominic cable trays are generally competitively priced, with bulk discounts available, making them affordable compared to other high-quality cable tray options. Dominic cable trays are available at discounted wholesale prices, and suppliers often offer bulk purchase savings, which can make them cost-effective for large projects (Opentip.com). The overall cost of cable trays, including Dominic trays, depends not only on the tray itself but also on support brackets, hangers, and installation labor, which can account for 20–30% of the total project cost. Pricing varies by material and type: galvanized steel is common and affordable, aluminum is lightweight but slightly more expensive, and stainless steel is the most costly due to corrosion resistance. Cable trays typically range from \$2 to \$25 per meter, depending on material, size, and finish, with bulk orders often reducing the price by 20–40%. In practical terms, while a single tray may seem inexpensive, the total installation cost can increase with additional components and labor. However, compared to conduit systems, cable trays like Dominic's are faster to install, which can reduce labor costs and make them more economical overall. For large-scale projects or industrial installations, Dominic trays are considered a cost-effective choice, especially when factoring in durability, ease of installation, and bulk pricing options.
