

Where are the fiber optic cable factories in Brunei

AI Overview

Brunei does not appear to have local fiber optic cable manufacturing factories; fiber optic infrastructure relies on imported cables and local installation by service providers. Overview of Fiber Optic Industry in Brunei

Brunei's fiber optic network is extensive, covering more than 92% of populated areas, with ongoing expansion to fully fiberize the country by 2024. The national backhaul network comprises over 6,000 km of fiber optics, managed primarily by Unified National Networks Sdn Bhd (UNN), which oversees installation, maintenance, and modernization of the network .

The country is also connected internationally via submarine cables landing at Tungku and Telisai sites, linking Brunei to Singapore, Hong Kong, Malaysia, Thailand, Vietnam, the Philippines, Japan, China, and the USA .

Fiber Optic Companies in Brunei

While there is no evidence of local manufacturing, several companies in Brunei supply, distribute, or install fiber optic cables:

- Dura Sdn Bhd – Provides fiber optic products and solutions for contractors, system integrators, and end users .

Other local suppliers and distributors may exist, but they primarily focus on importing and installing fiber optic cables rather than manufacturing them.

Key Points

Brunei relies on imported fiber optic cables for both terrestrial and submarine networks. Local companies focus on installation, network expansion, and maintenance rather than production. The country's strategic location and low power costs make it a hub for connectivity, but not for cable manufacturing .

In summary, if you are looking for fiber optic cable factories in Brunei, there are currently no known manufacturing facilities; the industry is centered on import, distribution, and network deployment.
