

Wholesale prices of computer room power distribution boxes

AI Overview

Wholesale prices for computer room power distribution boxes typically range from \$50 to \$500 per unit, depending on specifications, customization, and order volume. Price Range and Factors The cost of power distribution boxes varies widely based on size, amperage capacity, IP rating, and customization options. Standard units for computer rooms often start around \$50–\$100 per unit for basic enclosures, while high-capacity or modular units with advanced features such as circuit breakers, monitoring systems, or IP66-rated protection can reach \$300–\$500 or more per unit . Wholesale pricing generally decreases with larger order volumes, and many manufacturers offer OEM branding and custom busbar configurations for bulk purchases . Sourcing Options Alibaba and Made-in-China: Offer a wide range of wholesale power distribution boxes with factory-direct pricing, fast shipping, and customization options . Global Sources: Provides access to over 50 manufacturers with direct factory prices and high-quality units suitable for computer rooms . DirectIndustry: Features industrial-grade enclosures with detailed specifications, including amperage ratings, IP protection, and optional monitoring features . Customization and Delivery Many suppliers allow custom layouts, cable entry modifications, and logo embossing. Delivery times depend on order size and customization, with stock items often available for next-day shipping, while custom units may take longer . Recommendations For computer room applications, consider: IP-rated enclosures for dust and moisture protection. Modular designs for scalability. Integrated monitoring for power and fuse status. Bulk orders to reduce per-unit cost. By contacting suppliers directly, you can obtain current wholesale price lists and quotes tailored to your specifications and order volume .
